PROGRAMMING PROJECTS

GetFit Workout Generator

Javascript, HTML, CSS, and Firebase

🔗 [Prototype Link to prototype video](#)

🔗 <https://github.com/jehdz/GetFitWeb>

Algorithm design and analysis course group project. Fitness website that generates personalized workouts based on height, weight, gender, and fitness goal. Fun Interactive UX design.

Gravity Rocket

Python

🔗 [Prototype Link to prototype video](#)

🔗 <https://github.com/jehdz/GetFitWeb>

First programming project created freshman of college. A flappy bird inspired game created on Python shell. Balls used as obstacles are generated with a random speed whenever the sprite hits the center of the screen. Objective of the game is to avoid colliding with obstacles
